SKILLS

Java 8 (Spring Boot), JavaScript, Python, React.js, Redux, Node.js, Ruby on Rails, GraphQL, PostgreSQL, MongoDB, Docker, AWS

SUMMARY

Fullstack engineer with SRE/DevOps experience developing complex features, automating deployments, and supporting and maintaining cloud infrastructure.

EXPERIENCE

Software Engineer   May 2020 - Present
Dictionary.com

- Created and maintained CI/CI pipelines for sandbox, staging, and production environments.
- Managed and monitored cloud infrastructure on AWS.
- Created RFCs for design choices for project architecture and infrastructure.
- Developed performant features at high velocity.
- Actively created documentation to expedite onboarding for new engineers.

Software Engineer (Fullstack)   Jan 2020 - April 2020
Nisum

- Designed backend and frontend architecture and infrastructure for an internal onboarding application.
- Collaborated with team members to build the application from the ground up, including devops pipeline and cloud deployment.
- Participated in product demos to management to ensure that the application was meeting the functional and technical requirements. Took new MVPs back to the drawing board for development.
- Designed backend and frontend architecture and infrastructure for an internal cross technical-stack training application.

Technical Admissions Specialist   Aug 2019 - Dec 2019
App Academy

- Conduct technical and behavioral interviews for App Academy applicants.
- Direct mock interviews and provide instruction on data structures, algorithms, and interviewing techniques for bootcamp prep graduates.
- Provide feedback on the interview process or program curriculum.

Clinic Manager / Lead Medical Assistant   June 2015 - Mar 2019
Pain and Rehabilitative Consultants Medical Group

- Managed a department of 20 medical staff. Developed clinical manuals and trained medical assistants.
- Implemented billing compliance protocols for LC-MS/MS urine drug testing under Medicare guidelines, decreasing claim denials by over 90%.
- Supervised pharmacy operations and ensured compliance to the Medical Board of California and Board of Pharmacy.
- Ensured company-wide adherence to new healthcare legislation and best clinical practice through identification of problem areas, proposal to physicians/company partners, and clinic-wide notifications of the changes.

EDUCATION

App Academy - Immersive software development course with focus on full stack web development (August 2019)
